

Give your Syteline users a better way to process your companies vital information!

Whether your company uses all or one Syteline module, the **MOBILE PRODUCTIVITY SUITE** will increase your cost savings and decrease the number of human errors.

Using a wireless infrastructure, windows mobile device and a CF barcode scanner, users can process system transactions at the "point of use!"

## KEY BENEFITS

Dramatically INCREASE productivity

Eliminate NVA (non value added) activities

Real-time transaction processing

Real-time data validation

## KEY FEATURES

.NET architecture

No client software to set up or maintain

Runs in PIE (pocket internet explorer) and/or IE

Unlimited users (per site)

Stop wasting time, effort and resources by moving employees and materials all over the plant to conduct transactions. Instead, process all transactions instantly at their "point of use" with the new **MOBILE PRODUCTIVITY SUITE** from **Clear Technology Services.**

# MOBILE PRODUCTIVITY SUITE
